

DANILO AND LUCA FOSSATI FOUNDATION

INTERVENTIONS DURING
CRISES AND NATURAL DISASTERS

Fast helps when and where crises arise

The presence on disaster areas of missionaries, directly linked to our foundation, has helped us to be fast and to the point where the help is really needed. This way, generous donations have the guarantee to be used for the reconstruction of the areas hit by earthquakes, floods, or for other emergencies (famines, draughts, etc.)

Children are preferential and innocent victims of wars and genocides

Children are preferential victims of wars and genocides. There are areas where wars are chronic, and children have never lived in a peaceful and free country. Apart from chronic deprivation and violence, children in war areas are growing facing daily violence, death, and forcible ideologies. Therefore their emotional and physical growth is jeopardized. In these areas, such as Darfur in Sudan, our foundation has created schools and shelters in order to offer the new generation an opportunity to live, learn and grow safe and healthy.

Water supply to take care of children and their families

Water supply represents the primary concern in arid areas of the world. Without water no life can exist. Therefore, the construction of water wells by the foundation becomes the first strategic intervention wherever we promote communities and life. Around water wells life and villages start again to thrive.
