

DANILO AND LUCA FOSSATI FOUNDATION

FACTS ABOUT EDUCATION

Where needs arise

Our schools are built directly inside problematic environments: favelas, slums, etc. This way, Danilo and Luca Fossati Schools become a real social

centre for children and their families. In the centres we have built, children and young adults find a reliable answer to their multiple needs:

education, professional growth, moral development, amusement, sport facilities, and other. By keeping these centres alive, we have found that we can foster an important social, moral, and educational development in areas that are often forgotten by public or private attention. Many of our student, favelas's children, now have reached professional autonomy.
